

AMN NATURAL ACTIV BIO 7-3-7

Natural Fertiliser & Soil Activator enriched with living Mycorrhiza Fungi

THEORY:

Most plants have symbiotic relationships with natural fungi called mycorrhiza. They form a very dense mycelium network around the plant's roots, improving the uptake of water and nutrients. This is especially important for new plantings and re-cultivations.

Beside the friendly mycorrhiza fungi AMN Natural Activ also contains horn chippings and extracts of molasses, promoting microbial activity.

BENEFITS:

More blossoms, making the plant form fruits much earlier and intensifies fruit quality Mycorrhiza increases the root development of plants. A more lush growth is obtained and increased flowering. Increased stress tolerance.

APPLICATION:

This fertiliser is easy to apply due to micro-granular form. It can be used throughout the whole year, but preferably before preparing the soil, while planting or as a top dressing. To stimulate the beneficial processes, work the granules into the soil and add water.

Tree Nurseries/ Ornamental Trees	5 - 20kg / 100m ²
Current Bushes, Fruit Trees	5 - 20kg / 100m ²
Roses	10 - 25kg / 100m ²
Lawns & Urban Green	20 - 30kg / 100m ²
Cut Flowers	10 - 20kg / 100m ²
Container Growing	5 - 7kg / 100m ²

COMPOSITION:

Organic residues of food production, extracts of molasses, horn chippings, micro-organisms and living mycorrhiza fungi (Glomus sp).

TYPICAL ANALYSIS:

Nitrogen 7%, Phosphorus 3%, Potassium 7%, Magnesium 1%, Calcium 4%

Product complies with EC-directive VO (EG) 834/2007 and EC-directive VO (EG) 889/2008 and is approved for organic farming. Product is listed with FiBL, ECOCERT EU 889/2008 allowed Annex 1.

CONTENT: 25kg
