

Health-Sea[®] SEAWEED MEAL

... the natural feed supplement

Health-Sea[®] SEAWEED MEAL is a completely natural product made from Seaweed (mainly *Ascophyllum Nodosum*) which grows in the inter-tidal zones of rocky shores. Seaweed is unique in its ability to absorb from the sea the abundant supply of minerals and trace elements.

The high demands of today's intensive farming on farm animals require high quality food. Grass, hay and silage do not always contain the necessary amount of minerals, vitamins and trace elements which the animals need - especially if produced in an intensive farming systems. That is why most farmers have to feed mineral supplements. These are mostly man-made products, containing partly synthetic ingredients.

Health-Sea[®] Seaweed Meal is an unaltered natural product which contains an unequalled range of minerals, trace elements, vitamins and aminoacids.

AVERAGE ANALYSIS*

Nitrogen	1%	Iodine	480 mg/kg	Iron	300 mg/kg
Phosphorus	0.08%	Selenium	0.4 "	Cobalt	3.3 "
Potassium	3%	Zinc	32.7 "	Manganese	71.6 "

Calcium	1%	Chromium	<1 "	Aminoacids eg. Cystine, Glycine	
Chlorine	0.015%	Nickel	3.5 "	Leusine, Lysine, Thyrosine etc.	
Sulphur	0.85%				

*HEALTH-SEA Seaweed Meal is a natural product subject to seasonal changes. The analysis shows average values.

Application

We recommend the use of **Health-Sea[®]** Seaweed Meal as feed supplement over and above the normal farm supply of hay, silage, barley and concentrates. It is extremely valuable for dairy cattle but equally beneficial to beef, sucklers, calves, sheep, goats, horses, pigs and deer.

Application Rate

Cattle: 4-8 oz/head/day - ewes, goats, calves, deer: 2 oz/head/day - horses: 4-6 oz/head/day. Sprinkle over silage or mix into concentrate. Can be offered in self feeders.

Benefits

Health-Sea[®] Seaweed Meal supports the digestive system of animals and results in a better use of the feed. Reports from dairy farmers indicate improved fertility and regularity of calving, higher milk yield with better protein levels, increased sperm count in breeding bulls, reduction of incidents of retained cleansing, better coat condition, healthier calves with reduced scour occurrence.

Health-Sea[®] Seaweed Meal is GMO free and certified organic - IE-ORG-02
